Ping Scan com Scapy

```python
#/usr/share/python3

from scapy.all import *
conf.verb = 0
print ("Hosts Vivos")
for ip in range(1, 255):
        iprange = "192.168.0." + str(ip)
        pIP = IP(dst=iprange)
        pacote = pIP/ICMP()
        resp, noresp = sr(pacote,timeout=1)
        for resposta in resp:
                catulo = resposta[1][IP].src
                print (catulo)
```

from scapy.all import *
conf.verb = 0
